SEMUEL LEIJTEN

THE SMOKER'S LUNG

a respiration controlled audio effect
for instrumentalists looking for a
handsfree way to add organic sounding
expression to their performance

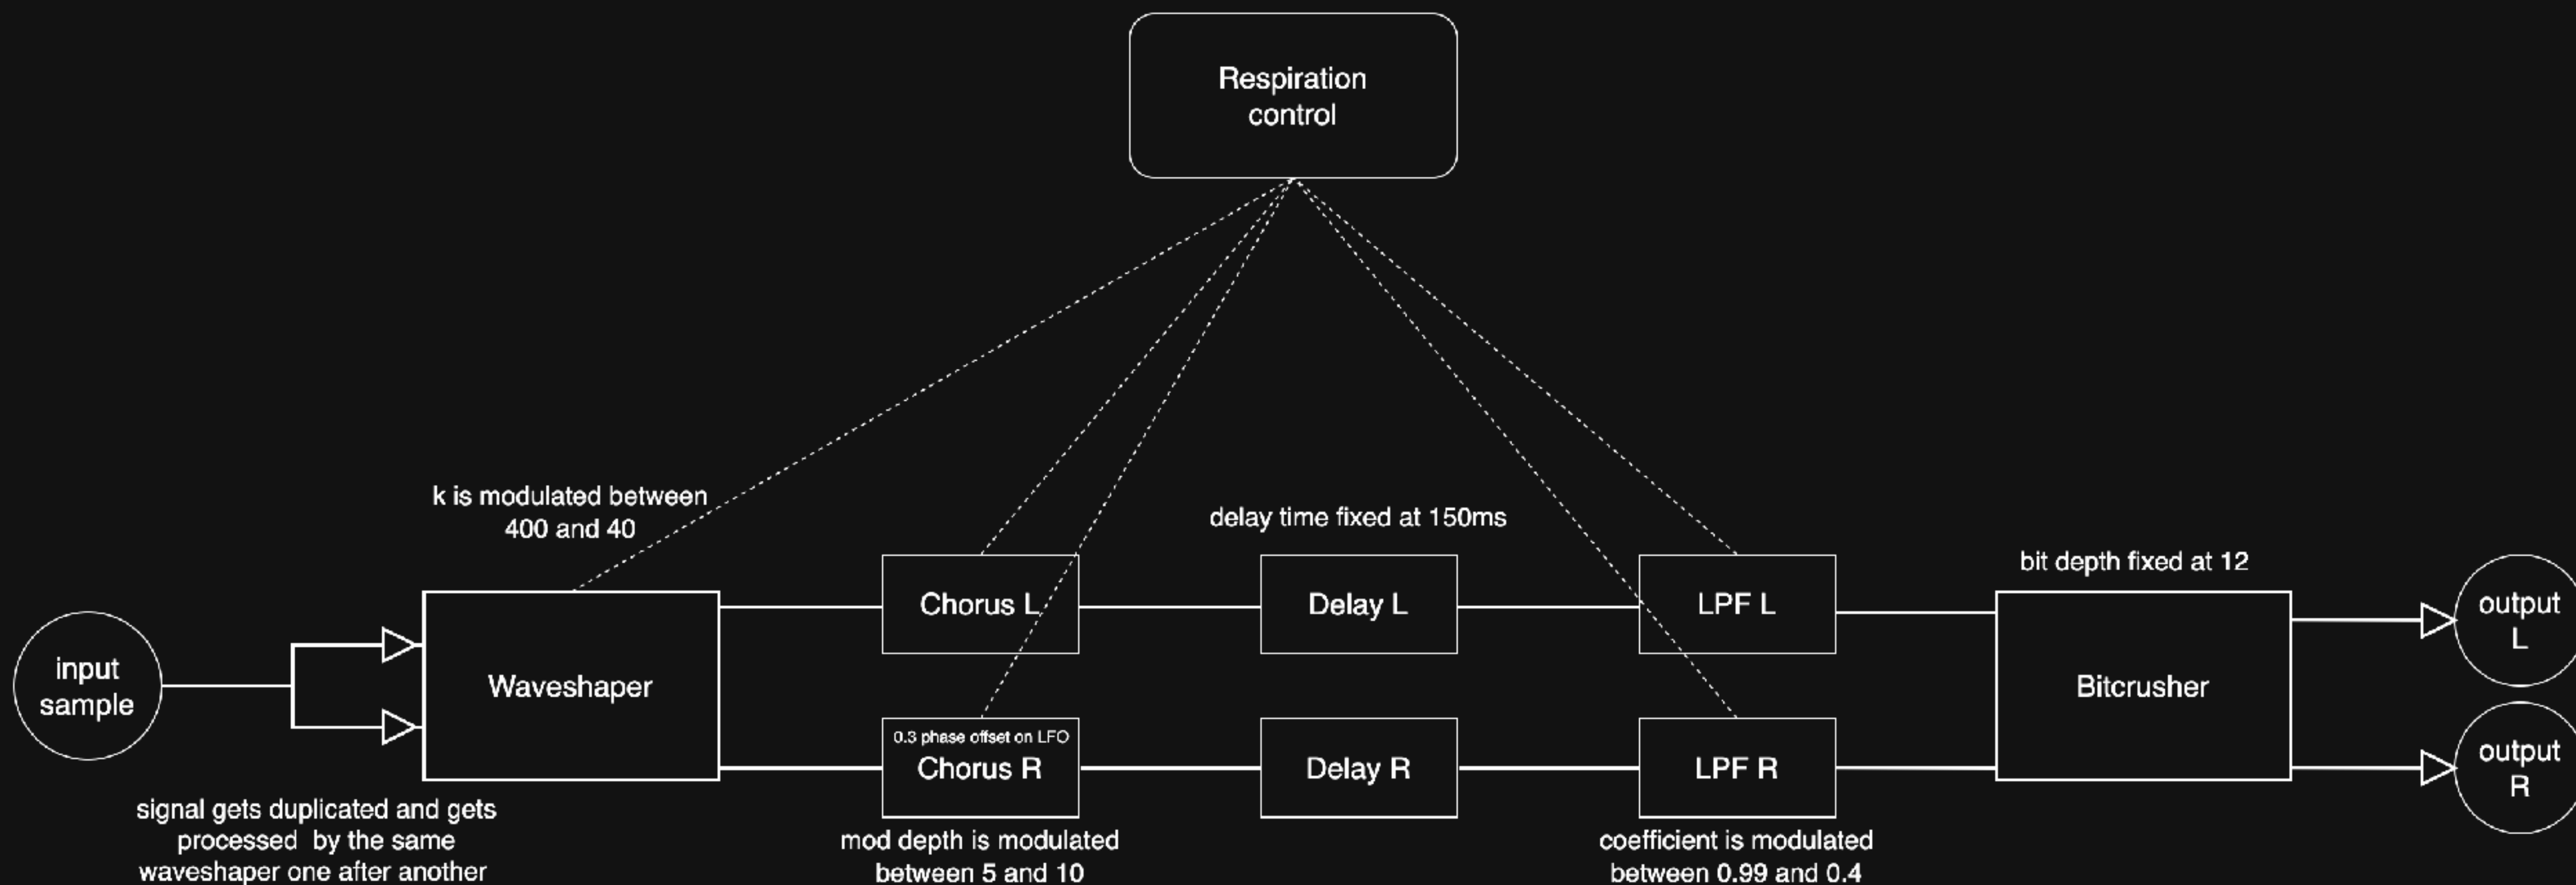

a combination of:

- waveshaping
- chorus
- delay
- filtering
- bitcrushing

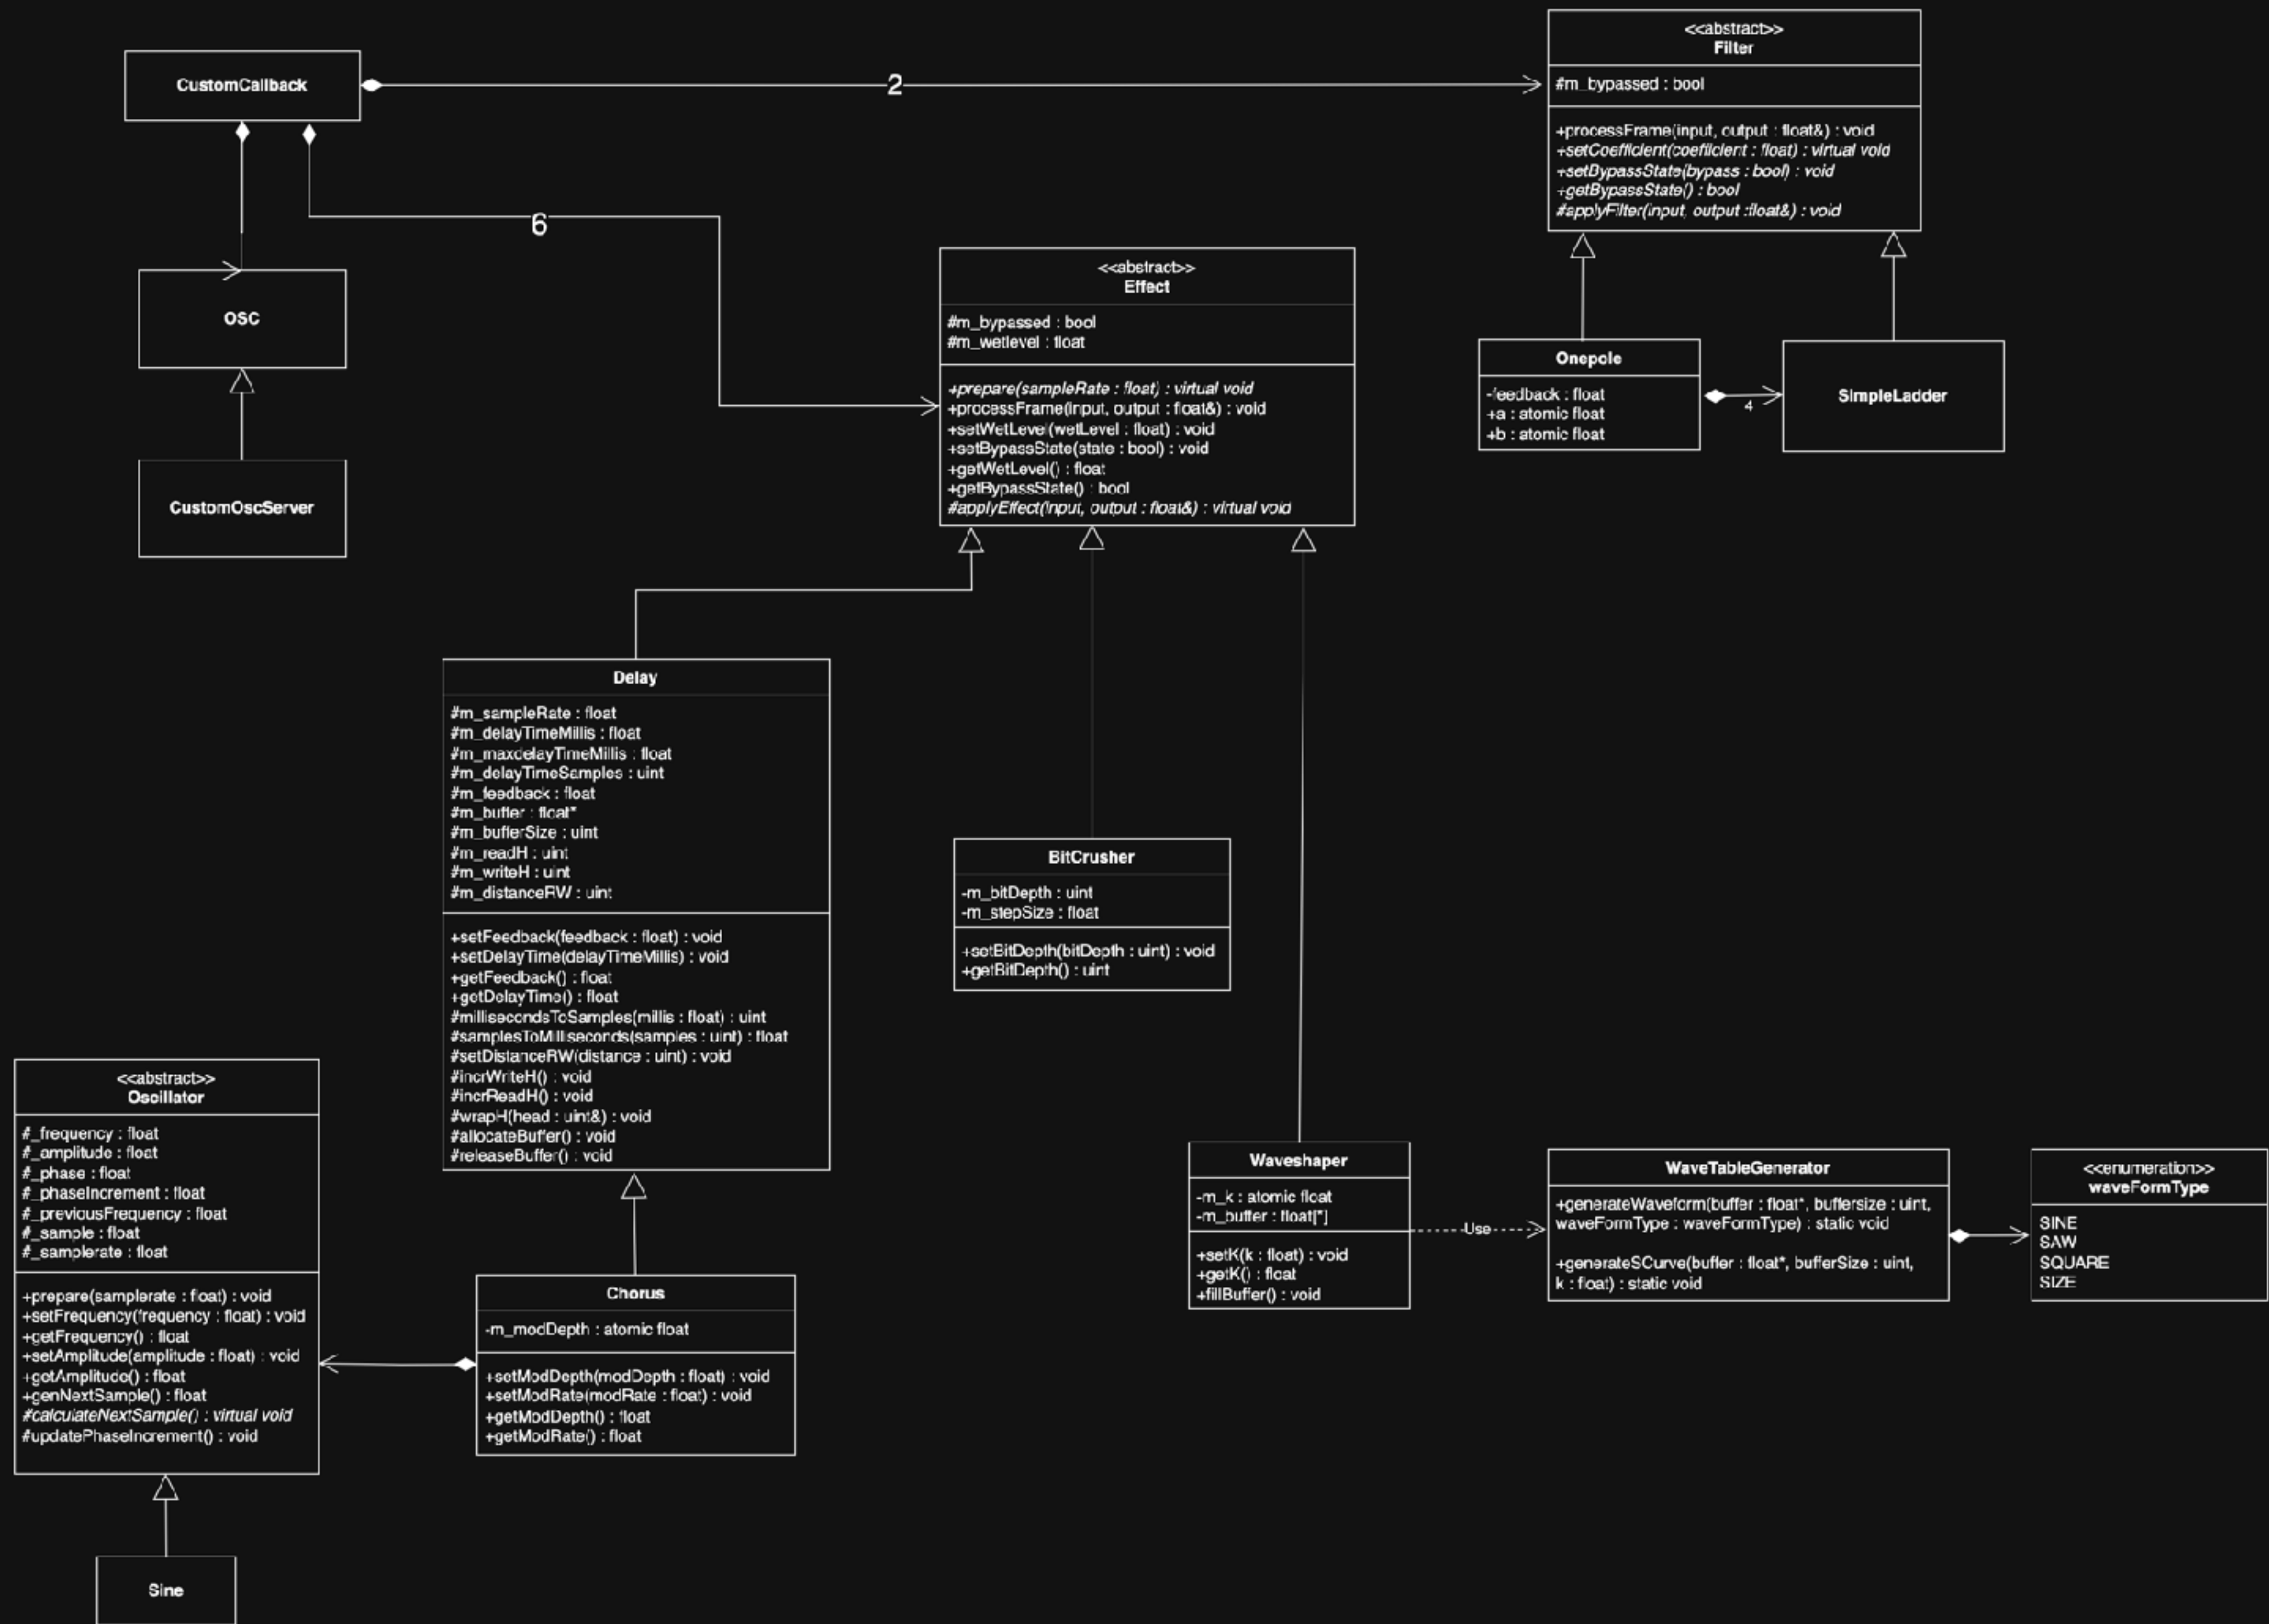

creates a fat and
dirty lo-fi sound
that modulates to
your breath

SYSTEM FLOW DIAGRAM

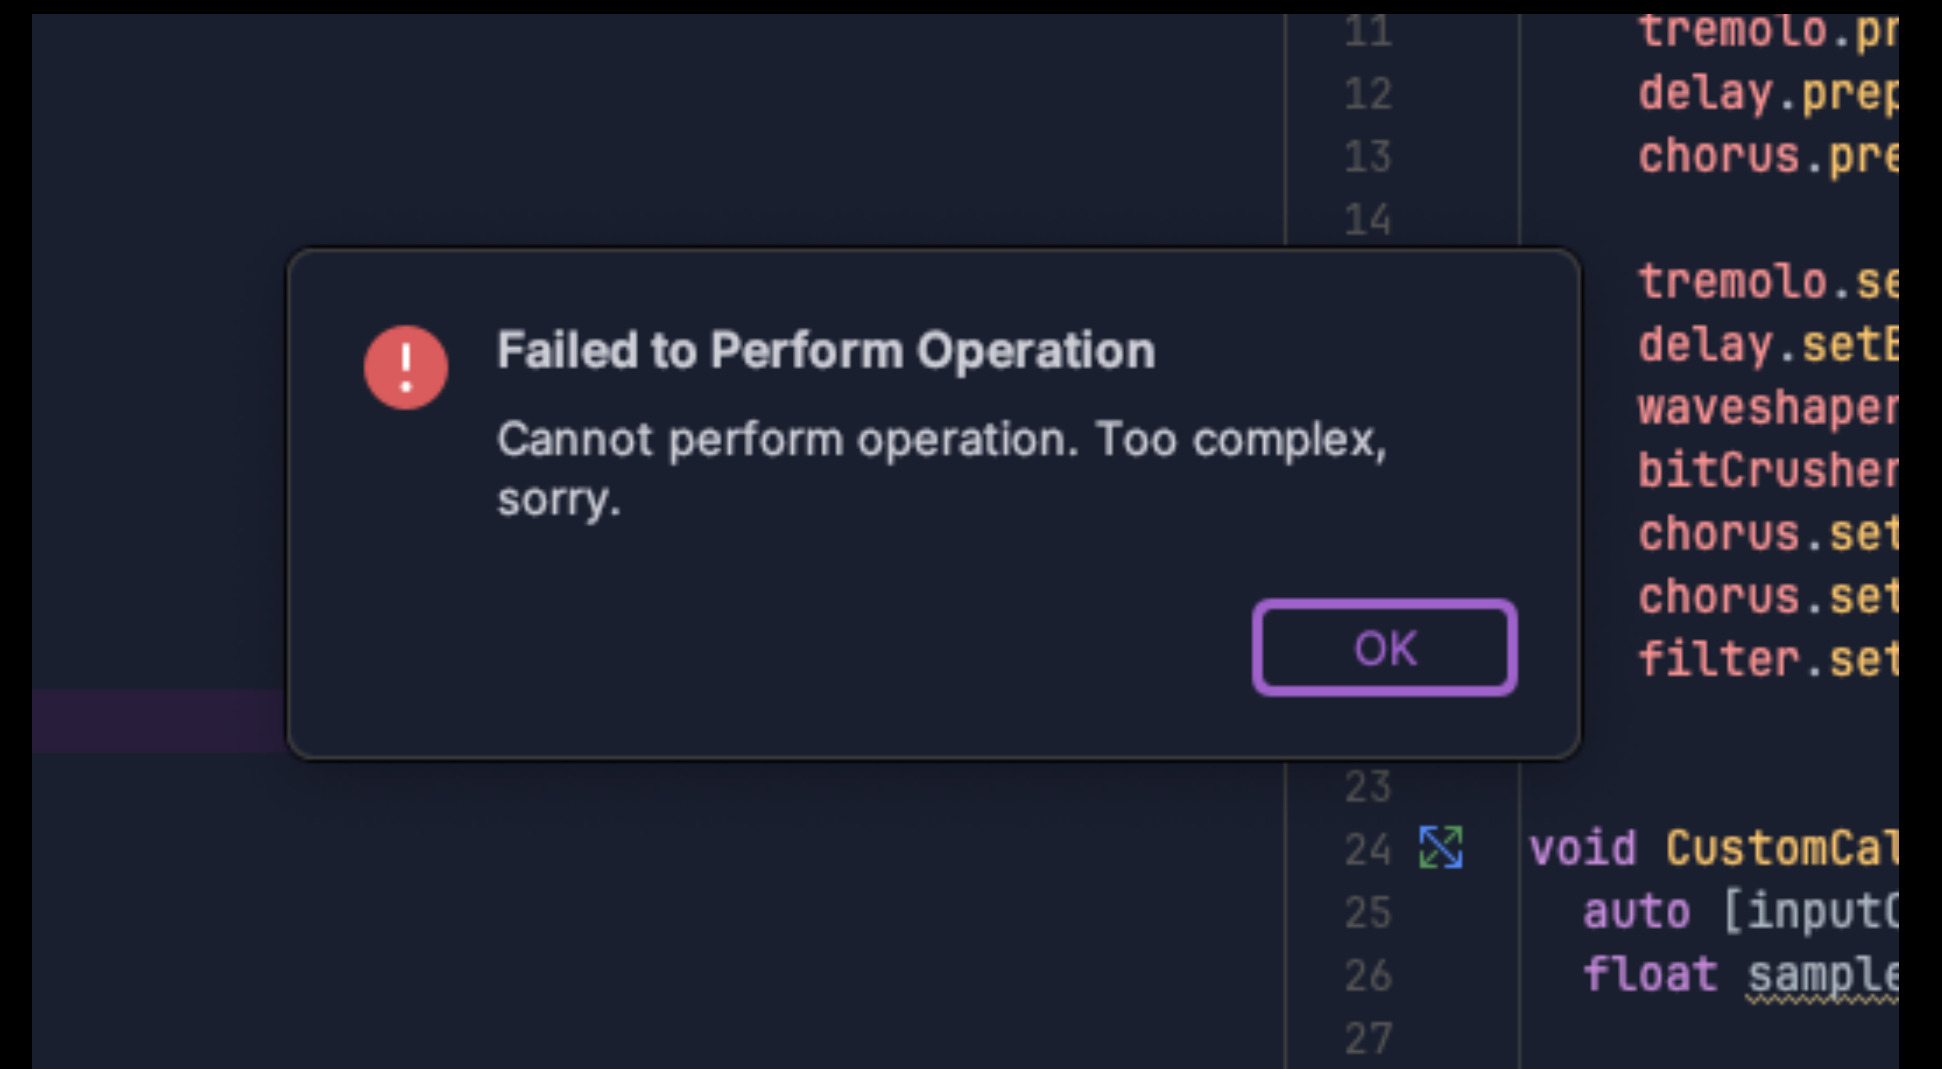

CLASS DIAGRAM

TAKE-AWAYS

- zelf nadenken is eng
- stereo effect class was vet omslachtig uiteindelijk
- eerder beginnen met class diagram
